DEFINITIONS:

- **Reject Kernel** is defined as kernel with major defects/disorders suitable only for non-food use.
- **Commercial Kernel** is defined as kernel exhibiting discolouration and discoloured defects but fit for human consumption.
- **Premium Kernel** is defined as fully matured kernel free from significant defects/disorders in its current form.
- **Whole Kernel** is kernel, which is not split or separated into halves, with no more than ¼ of the kernel missing, given that the kernel contour is not materially affected by the missing portion.
- **Half Kernel** means approximately half of a whole kernel as it normally separates.
- **Infestation** those which are typical of the Product.
- **Loose shell** means any loose shell, which will not pass through a 3mm square opening.
- **Impacted shell** means any kernel with embedded shell which will not pass through a 3mm square opening.
- **Pasteurised:** refers to kernel processed through a Napasol pasteurisation system which has been demonstrated to provide a >5 log reduction of *Salmonella* sp. on macadamia kernel.
- **Grading of kernel is based on a statistical testing regime.** Kernel is collected continuously with the composite sample being representative of the day code to determine the kernel quality.
